EDITORIAL

LET'S FIND OUR INNER PEACE

“Peace is the concept of harmonious well-being and freedom from all kind of hostile aggression. In a social perspective, peace is commonly used to mean a lack of conflict (for example war) and freedom from fear of violence between individuals or any kind of heterogeneous (relatively foreign or distinct) groups.”

This is what Wikipedia says about peace, which I think showcase

only the external perspective of the term. I understand Peace as a more personal affair and an experience that we can cherish when we have settled our past, transformed our desires to pure vision and establish ourselves in the present.

Yes, the present scenario of political tension makes all of us concerned and I am sure turning inwards and finding our inner calm through meditation and the sensibility and balance gained by connecting with the highest wisdom of the Supreme Almighty will help us think, decide and act the right way.

This is the second edition of “Godlywood – News and Views” with a new outlook and presentation style, modified as per your suggestions and feedback.

“Studio Corner” - as in the previous issue, will introduce you to the unique individuals behind the various programs produced in Godlywood Studio. This column is significant as the personalities introduced in the Studio Corner are young brothers and sisters dedicated for the spiritual cause, who are never attracted to the pomp, show and glitter of the outside world. It is by their dedicated efforts now Godlywood content showcased in “Om Shanti Channel” is aired in 125+ channels in India and abroad.

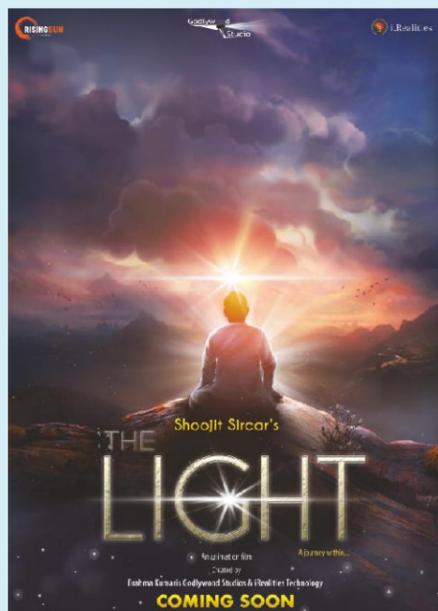

“Guest Corner” – a new feature - is dedicated for the sharing of the experiences of Guests who visit the Brahma Kumaris Headquarters and Godlywood Studio every once in a while. Their story of inner change which they experienced within the short tenure of their visit is inspiring and worth reading.

You can also find an innovative “Tech-Corner” for updates on the latest and innovative technologies used for the projects in Godlywood Studio and a “News-Corner” to highlight the special services happening in studio.

Friends, I will continue to talk to you in this space, we will share wonderful content, stuff that will inspire new ideas and lead you eventually to take thoughtful action on life and things that matters in life. “May your every day be auspicious, may your whole life be prosperous and may the boundless blessings and love of the Supreme Almighty shower on you all the time”

With a lot of Good Wishes,

inner self.”

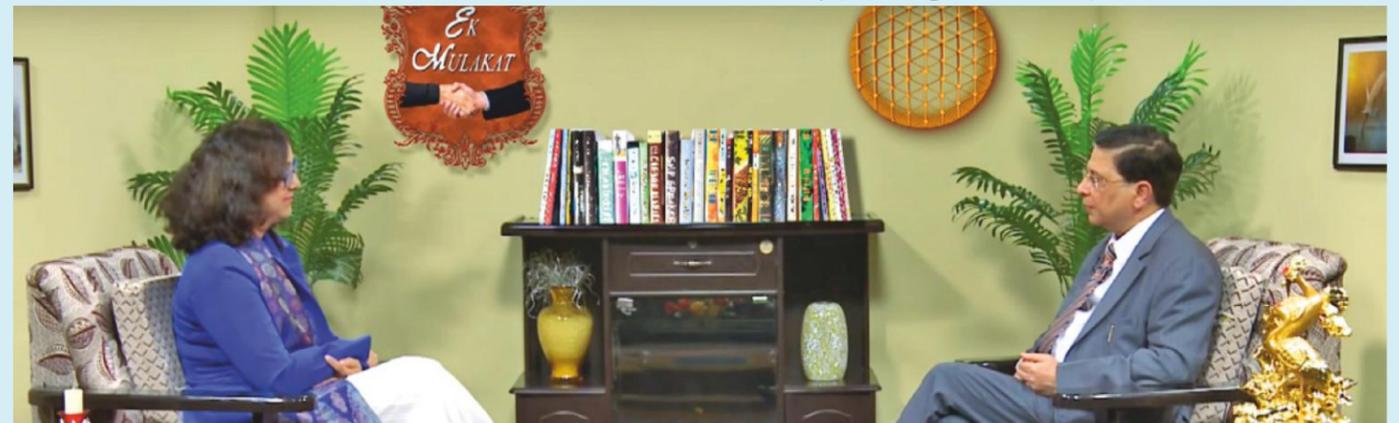

“When I entered the BK premises, I was overwhelmed to see the infrastructure. I felt a kind of vibrancy in the atmosphere. I understood, this is not the spirituality ordinary people think and talk about – this is more than that. Something entered into my inner self.”

“When you have a captivating audience like this, you are eager to communicate, to share and you like to speak to them. I learned from the elder sisters of the organization that 'unless you share a sense of spirituality, feeling or a memorable moment with others, it is wasted'. Sharing is also an art. Through your presence, words and activities you can transmit it. The topic selected for the program was a really cohesive one - 'Spirituality, Environment & Science'.

man. That will always be there but simultaneously we must learn to accept & also recognize our limitations. For example, if I don't know how to drive a car, there is no point in aspiring for a car. That's called accepting the limitation.

‘I always emphasize on 'Physical Morality' which can cultivate a sense of balance within you. This term includes how to balance between mind and body. Some people pollute their mind & some pollute their body. There should not be any pollution of thoughts. Because it is a gift from nature, so it is your duty to maintain and sustain it. We must learn to respect Humanity. We need to respect the other person's feelings & identity. Sublimation of emotions can also come from mutual respect & Meditation. Filtration of thought is a subconscious act and we must allow your sub-consciousness to function.’

‘The effort of this organization as I perceive, they are really planting a sense of peace on mother earth.

A moment from ‘Ek Mulakt’ in Godlywood Studio

We should ask ourselves - Who Am I? What Am I? Where am I coming from? What is my calling?

Strong relationships, an intense sense of connectivity and an eagerness to belong to a world which is in the making - I think that is the basic thought which impressed me a lot. It's because I always believe that essential thought of the universe is 'every particle of universe is within you'. So, we are never detached from the universe. We all should take out time to meditate because that's the time our energies are focused and we are centered.”

“Peace of mind comes from what you intend to do with yourself. When we accept our limitations, there should be contentment. Contentment means not to aspire. Aspiration/desire is fundamental perception of

These activities can also inspire others to care for the environment.”

“The attitude of selfless service which I observed here is really amazing. The feeling of serving others spiritually is in its own a great deed. If we do good for others, there is no need to search for heaven, heaven will come in search of us. This is the real essence and glory of spirituality. The organization is also offering spiritual empowerment to women across the world. At the same time, it endeavors to raise men's awareness to support this objective.”

I am happy that the organization runs youth & women's empowerment training programs, frequent free medical camps, a rural development program, and innumerable other humanitarian projects.

DISCOVERING OUR INNER SPACE USING 'AUGMENTED REALITY'

A Smartphone/tablet, the free Zappar App and a few still images with a zappcode is all you need to set out on an incredible journey towards discovering

unfathomed realms of your own inner space!

Augmented reality is an interactive experience of a real-world environment where the objects that reside in the real-world are "augmented" or enhanced by computer-generated perceptual information, sometimes across multiple sensory modalities, including visual, auditory, haptic, somatosensory, and olfactory.

It's quite easy to start this interactive Journey – Using the Zapper App scan the zappcode beside each image, cover the whole image with your phone camera and the still image will come to life with a one-minute commentary for each image. The 'Augmented' Journey to the inner space ends with a meditation led by Sis. Jayanti, one of the world's most experienced teachers of Raja Yoga.

All the Animations which helps you to dive deep into your inner space in this 'Augmented' journey is developed in the Animation Dept. of Godlywood Studio. This was the most important part in the whole Augmented Reality – Meditation concept as the still images needed to be brought “alive” when a smartphone camera covers it. All that artwork had to be animated frame to frame – which is a highly demanding and a costly process. (Remember the animated movie “Tangled” where 68 animators worked day in and day out costing 50,000 US Dollar

per second of the Film!) But this challenging task was gifted as a service by the Animation Department of Godlywood Studio with just 10 Animators, supervised by B.K.Sushil as per the directions from Exe. Director Harilal Bhanushali.

The concept of the eight short steps was first proposed by Author and journalist Neville Hodgkinson which were modified into images by the French Art Director Cecile

Cayla Boucharel. These eight images which forms the whole Augmented Inner Space Journey is being exhibited in the “Inner Space” shop and drop-in meditation Centre in the city of Oxford where people can use their smartphone and App to start their personal inner journey!

Augmented Reality is a future oriented Technology, slowly gaining momentum in the world scenario, with very few Apps developed in India, and TEAM Godlywood is proud and grateful to incorporate this already into the workflow, thanks to the skill and acumen and the constant R&D by our young and dedicated stalwarts!

BBC Radio Oxford's Kat Orman visited the “Journey into inner space” exhibition to try out the experience for herself and recorded a chat with Neville Hodgkinson followed by an interview with Rosemary Turner. Follow the link to find Kat Orman giving a first hand Narrative:
